NILE PLAZA

Private Residence

A monument to fine living

NILE PLAZA

Private Residence

Cairo's most desirable address

Nile Plaza, stands a mighty 30 stories high and has undoubtedly become Cairo's most eagerly sought after address for both residents and professionals.

The stunning complex is comprised of :

- 144 exclusive, luxury residential suites, each one is constructed to the highest specifications, designed in 10 different architectural layouts.
- A five-star Four Seasons Hotel is an integral part of the development, featuring 366 luxury guest rooms and suites with state of the art amenities.
- Four exclusive restaurants offering a choice of superb international cuisines, a dazzling night club and a magnificent 1000 square meter ballroom, unmatched health club and wellness center, fully equipped gym and indoor and outdoor swimming pools.
- A multi-level 5000 square meter shopping mall of distinction featuring two floors including a number of elegant shops and stores.
- Commercial office spaces overlooking the Nile River, meeting rooms and business center.
- Underground parking on three levels.

Nile Plaza has changed cairo's skyline for ever

Location

Nile Plaza, Cairo's most outstanding new development boasting its own spectacular panorama of the Nile at its widest point. Nile Plaza is located in Garden City, facing the Nile River.

Cairo's Nile River is highly reputed as one of the most significant and expensive residential and tourist areas in the charming Capital of Egypt.

In contrast to the hectic pace of Downtown, the western-style Garden City is an elegant lattice work of verdant, tree lined, winding streets whose pleasant sanctuary is now home to many embassies, banks and government departments.

The Nile Plaza site, on the scenic Corniche, is one of the last places on the Nile that is perfect to build such an important development.

It is, without doubt, one of the most fitting address for Nile Plaza- the new lotus flower of Garden City.

One is nearer Heaven in a garden than any where else on earth

Nile Plaza Shopping Mall

Food court

"Nile Plaza will be a premier center in Cairo attracting the preeminent superb residents in Cairo and affluent tourists and business visitors as well as those aspiring to this lifestyle."

The area is highly congested with a high volume of traffic.

The retail element of the shopping mall is styled to have two main entrances, of both side streets plus Hotel lobby entrance. The parking is one area that is significantly marked for retail users and that would ideally attract the best retailer and the best shoppers.

Lifestyle shops, sustainable design, renovation and the international building codes were all highly considered when developing such an impressive shopping complex.

So, Nile Plaza shopping mall would be a synonym to all these factors:
Exclusive Stores , High Occupancy and Upper end market.

Retail mall

Nile Plaza amenities

Nile Plaza, as a true symbol of quality, is an intelligent, technically advanced, high rise building, characterized by the aesthetic excellence of its design and construction as well as the uncompromising quality of the materials used. The most prominent and unique aspect of the building will be its granite exterior. The podium and tower exterior will be clad with a natural stone with aluminum framed green tinted glass. Glass, metal and aluminum elements will be in two matching light greens. The highest standards of specifications covering exterior lighting, communications systems, building management systems, laundry and housekeeping, parking control, waste handling, kitchens, security, and acoustics will be offered at the Nile Plaza.
